

Ski & Board Tuning

Snowboard Cross Team visiting ski school & rental shop Thoma at Feldberg

From 10 to 12 February the Snowboard Cross World Cup 2017 took place at Feldberg, Germany. As „Official Supplier“ of Snowboard Germany, Reichmann was live on site to support the Snowboard Cross Team at their races. Afterwards, the team stepped by for a short visit at the newly equipped ski rental shop of the ski school Thoma at Feldberg.

During the Snowboard Cross World Cup the athletes were mastering a course with various obstacles, having to deal with steep curves, jumps and waves. In each period, four snowboarders had to compete against each other in a KO system. Unfortunately, no German athlete could qualify for the final race in the World Cup, but the young snowboard crossers surely gained valuable experiences for further competitions.

New ski rental shop at Feldberg with Reichmann storage systems

The owners of ski school Thoma at Feldberg were very pleased about the subsequent visit of the Snowboard National Team. Recently, in the ski school a big ski and snowboard rental shop was established and equipped with Reichmann Rent & Depot systems. The various storage systems offer now space for the complete ski equipment from ski and boards, over ski boots, ski poles to helmets. Additionally, a boot drying system is integrated.

Reichmann Rent & Depot systems

The Reichmann storage series contain a variety of different systems for secure storage, drying or disinfection. All parts are designed for long-term usage and are high-grade powder-coated. In the last year, another ski depot at Feldberg was already fully equipped with Reichmann rent and depot systems.
